

Chorducopia Troubleshooting Guide

This guide reviews issues you may encounter with Chorducopia and how to fix them. As always, EMAIL us at support@tanageraudioworks.com.

Issue - I can't hear any audio in Chorducopia.

We use the default sound card and volume settings for your computer - as such there are no audio controls associated with Chorducopia. Make sure your speakers are on and the volume set at a reasonable level. You should hear sound when you click on any chord.

Issue - How do I find the Help menu in Chorducopia?

To get help in Chorducopia, click on the text "Chorducopia" in the upper left. The user interface will pivot revealing more controls. Press "Support" to go to the Tanager AudioWorks support page, or "Community" to go to the Tanager AudioWorks Community web page.
